

GreenLight

What is GreenLight?

GreenLight is the ultimate application for managing your entire computing infrastructure. With maximum scalability and flexibility, GreenLight gives you the power to automate IT administration to increase the productivity of your teaching staff and pupils and the school as a whole. From innovative features like asset management and patch management to remote monitoring, GreenLight enables you, together with LuxTech, to automate day-to-day IT tasks, improving systems performance.

By managing your IT environment as one, IT Professionals are able to check for network vulnerabilities, update software and deploy security patches at once, eliminating the need to repeat mundane administrative duties for each client and saving valuable time that can be spent on more proactive projects.

Features

GreenLight includes the following application features:

- Fully automated, recurring and complete hardware and software inventory and audits
- Fully automated patch management
- Fully automated and scheduled software deployment and system management
